Education

COER University (College of Engineering Roorkee)
Bachelor of Technology in Computer Science (CGPA: 8.2) Expected June 2026
Nalanda Public School, Muzaffarnagar
Intermediate Percentage: 78.4
Metric Percentage: 89.2

Skills Summary

- **Programming Languages:** Python, C++
- **Artificial Intelligence:** Large Language Models (LLMs), Retrieval-Augmented Generation (RAG), Prompt Engineering, NLP, Risk Scoring, Compliance (GDPR/HIPAA)
- **Data Science:** Machine Learning, Deep Learning, Data Visualization, Statistical Analysis
- **Libraries Tools:** Pandas, NumPy, scikit-learn, TensorFlow, PyTorch, FAISS, Hugging Face, Streamlit, Matplotlib, Seaborn
- **Web Development:** Flask (API Deployment)
- **Database:** MongoDB
- **Soft Skills:** Teamwork, Communication, Problem Solving, Time Management

Experience

AI Machine Learning Intern — Infosys Springboard **January 2025 - March 2025**

- Gained in-depth knowledge of **Large Language Models (LLMs)** and **Retrieval-Augmented Generation (RAG)**, applying them to real-world legal document processing.
- Developed an **AI-powered legal document summarizer**, improving **risk analysis efficiency by 35%** and reducing **manual review time by 40%**.
- Integrated **FAISS** for efficient document retrieval, boosting **retrieval speed by 50%** and **accuracy by 20%**. Deployed the project on **Streamlit** and **Hugging Face**, achieving **1,500+ user interactions in 3 months**.
- Explored **GDPR** and **HIPAA compliance**, reducing potential legal risks by **30%** and enhancing the system's regulatory alignment.

Projects

AI-Powered Legal Document Summarization and Risk Assessment **January 2025 - March 2025**

- Developed an AI system for legal document summarization and risk assessment using **LLMs** and **RAG techniques**.
- Integrated **FAISS** for fast retrieval and deployed the project on **Streamlit** and **Hugging Face**.
- Implemented risk scoring mechanisms ensuring **GDPR** and **HIPAA** compliance, reducing legal risks.

Skin Disease Detection using EfficientNetB0 **September 2024 - November 2024**

- Built a deep learning model with **EfficientNetB0**, achieving **92% accuracy** on a dataset of 10,000 images.
- Utilized **TensorFlow** and **Keras** for model training, fine-tuning, and real-time prediction.
- Developed a web interface using **Flask** for seamless image upload and disease detection.

Delhi Metro Network Analysis and Route Optimization **June 2024 - August 2024**

- Performed graph-based analysis of the Delhi Metro network using **NetworkX** and **Graph Theory**.
- Modeled stations as nodes and routes as weighted edges, optimizing travel routes to reduce average travel time by **18%**.
- Visualized spatial insights using **Matplotlib** and **GeoPandas** for enhanced network understanding.

Certifications / Achievements

- Hackthon 2025 spark 9.0 winner
- Ideathon 1.0 - COER University
- Data Science and AI Course Certificate – Infosys Springboard
- Python for Data Science and AI– IBM
- Deep Learning Specialization - DeepLearning.AI (Score: 96.25 percent) (Coursera)
- Tata Crucible Contest Participation Certificate
